

**International
Group of
Controlling**

THE INTERNATIONAL
VOICE OF CONTROLLING

OUR VISION

We set and establish international recognized standards for controlling and the required education and training.

OUR MISSION

We are an international platform of institutions and organizations that understand controlling as a core element of sustainably successful management.

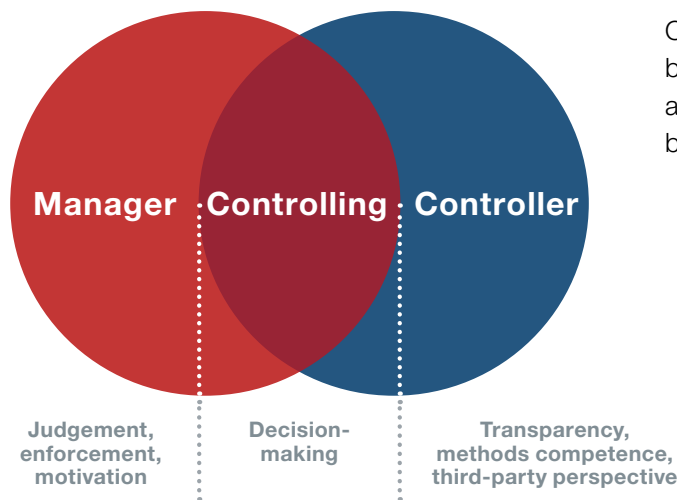

We develop, coordinate and disseminate

- ✎ an international uniform applicable controlling conception and terminology
- ✎ the profession and role of controllers as partners of management,
- ✎ as well as standards for the qualification of controllers and managers.

OUR SERVICES

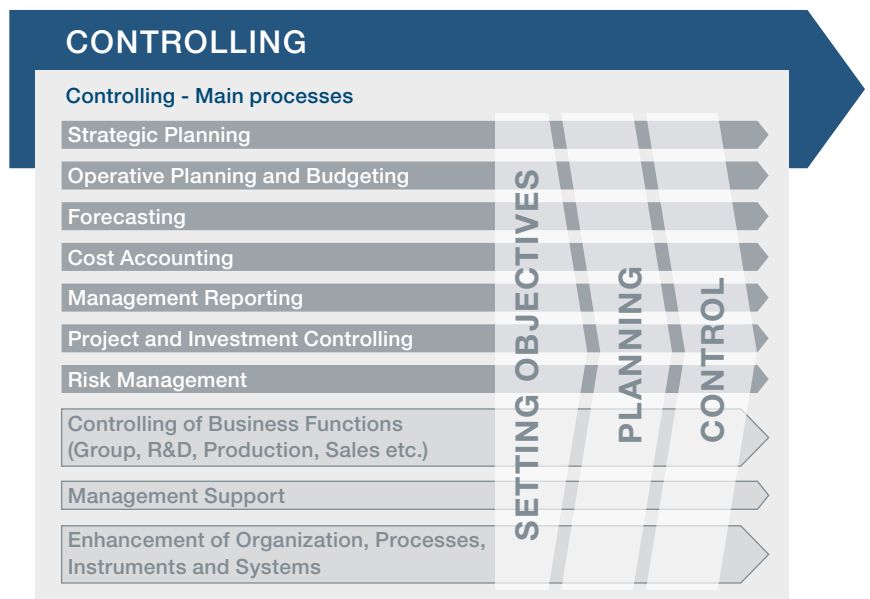

- Development and publication of professional standards in the field of controlling
- Strengthening the perception of the role and function of the controller via appropriate public relations work and creating a common diction in controlling language
- Establishing codes of practice, performance and quality standards for the education and further training of IGC members
- Organization of conferences for the exchange of ideas
- Initiation of joint research projects in connection with scientific and economic practice
- Publications

OUR UNDERSTANDING OF CONTROLLING

Our understanding of “Controlling” is characterized by three features: target-oriented control, controllers and managers acting as a team, and interplay between analytics and soft factors.

Controlling is a management activity. It means being objective-driven and directing all decisions towards achieving this end. Consequently, planning and calculative practices, as well as monitoring and control, are of central importance. This applies to each individual management decision as well as to the management of the corporation as a whole.

OUR CONTROLLER MISSION STATEMENT

As partners of management controllers make a significant contribution to the sustainable success of the organization. Controllers ...

- 1.** design and accompany the management process of defining goals, planning and management control so that every decision maker can act in accordance with agreed objectives.
- 2.** ensure the conscious preoccupation with the future and thus make it possible to take advantage of opportunities and manage risks.
- 3.** integrate an organization's goals and plans into a cohesive whole.
- 4.** develop and maintain all management control systems. They ensure the quality of data and provide decision-relevant information.
- 5.** are the economic conscience and thus committed to the good of an organization as a whole.

YOUR ADVANTAGES AS AN IGC MEMBER

The IGC membership enables you to

- be actively involved in the international development of controlling
- help to develop and anchor controlling standards
- have access to the latest trends and controlling innovations
- keep pace with the times concerning all themes related to controlling education
- exchange experience with other educational and training institutions
- network with other IGC members and to learn from others
- make use of the numerous international contacts and the cooperation with globally active accounting and management organizations
- work together on publications and to use these for your own business area
- take part in interesting conferences
- distinguish yourself from others with the help of IGC quality standards
- give your courses the IGC seal of quality and to guarantee that they meet international standards
- participate in the annual international conference for all IGC members

Our members

Members of IGC are relevant organizations that operate in the field of controlling, in particular in training, education, consulting and business intelligence.

ABOUT IGC

The International Group of Controlling – IGC

is an international common interest group of institutions and companies in form of an association based in Switzerland. It was founded in 1995. IGC is managed by the management board. New insights and results from the working bodies are presented to all members at the annual general assembly where important decisions are made.

The present management board

PROF. DR. HEIMO LOSBICHLER, Chairman, FHOÖ, Steyr/Austria

DR. RITA NIEDERMAYER-KRUSE, Deputy Chairman, Controller Institut, Wien/Austria

PROF. DR. KLAUS MÖLLER, University St. Gallen/Switzerland

DR. KLAUS EISELMAYER, CA AKADEMIE AG, Wörthsee/Germany

UNIV. PROF. DR. RONALD GLEICH, EBS Business School, Stuttgart/Germany

The IGC Seal of Quality

This seal of quality is awarded by IGC International Group of Controlling. It guarantees that the respective certified educational program meets IGC quality standards.
